Table of Contents

- NDMP error messages. 1
 - Network communication error 1
 - Message from Read Socket: error_string 1
 - Message from Write Dirnet: error_string 1
 - Read Socket received EOF 1
 - ndmpd invalid version number: version_number `` 2
 - ndmpd session session_ID not active 2
 - Could not obtain vol ref for Volume volume_name 2
 - Data connection type ["NDMP4_ADDR_TCP"]["NDMP4_ADDR_TCP_IPv6"] not supported for ["IPv6"]["IPv4"] control connections 3
 - DATA LISTEN: CAB data connection prepare precondition error 3
 - DATA CONNECT: CAB data connection prepare precondition error 3
 - Error:show failed: Cannot get password for user '<username>' 4

NDMP error messages

Network communication error

- **Message**

`Network communication error`

- **Cause**

Communication to a remote tape in an NDMP three-way connection has failed.

- **Corrective action**

Check the network connection to the remote mover.

Message from Read Socket: error_string

- **Message**

`Message from Read Socket: error_string`

- **Cause**

Restore communication from the remote tape in NDMP 3-way connection has errors.

- **Corrective action**

Check the network connection to the remote mover.

Message from Write Dirnet: error_string

- **Message**

`Message from Write Dirnet: error_string`

- **Cause**

Backup communication to a remote tape in an NDMP three-way connection has an error.

- **Corrective action**

Check the network connection to the remote mover.

Read Socket received EOF

- **Message**

`Read Socket received EOF`

- **Cause**

Attempt to communicate with a remote tape in an NDMP three-way connection has reached the End Of File mark. You might be attempting a three-way restore from a backup image with a larger block size.

- **Corrective action**

Specify the correct block size and retry the restore operation.

ndmpd invalid version number: version_number ``

- **Message**

```
ndmpd invalid version number: version_number
```

- **Cause**

The NDMP version specified is not supported by the storage system.

- **Corrective action**

Specify NDMP version 4.

ndmpd session session_ID not active

- **Message**

```
ndmpd session session_ID not active
```

- **Cause**

The NDMP session might not exist.

- **Corrective action**

Use the `ndmpd status` command to view the active NDMP sessions.

Could not obtain vol ref for Volume volume_name

- **Message**

```
Could not obtain vol ref for Volume vol_name
```

- **Cause**

The volume reference could not be obtained because the volume might be in use by other operations.

- **Corrective action**

Retry the operation later.

Data connection type ["NDMP4_ADDR_TCP"|"NDMP4_ADDR_TCP_IPv6"] not supported for ["IPv6"|"IPv4"] control connections

- **Message**

Data connection type ["NDMP4_ADDR_TCP"|"NDMP4_ADDR_TCP_IPv6"] not supported for ["IPv6"|"IPv4"] control connections

- **Cause**

In node-scoped NDMP mode, the NDMP data connection established must be of the same network address type (IPv4 or IPv6) as the NDMP control connection.

- **Corrective action**

Contact your backup application vendor.

DATA LISTEN: CAB data connection prepare precondition error

- **Message**

DATA LISTEN: CAB data connection prepare precondition error

- **Cause**

NDMP data listen fails when the backup application has negotiated the CAB extension with the NDMP server and there is a mismatch in the specified NDMP data connection address type between the NDMP_CAB_DATA_CONN_PREPARE and the NDMP_DATA_LISTEN messages.

- **Corrective action**

Contact your backup application vendor.

DATA CONNECT: CAB data connection prepare precondition error

- **Message**

DATA CONNECT: CAB data connection prepare precondition error

- **Cause**

NDMP data connect fails when the backup application has negotiated the CAB extension with the NDMP server and there is a mismatch in the specified NDMP data connection address type between the NDMP_CAB_DATA_CONN_PREPARE and the NDMP_DATA_CONNECT messages.

- **Corrective action**

Contact your backup application vendor.

Error:show failed: Cannot get password for user '<username>'

- **Message**

Error: show failed: Cannot get password for user '<username>'

- **Cause**

Incomplete user account configuration for NDMP

- **Corrective action**

Ensure that the user account is associated with the SSH access method and the authentication method is user password.
