## **Delete directories**

#### **Delete directories overview**

Beginning with ONTAP 9.8, you can delete large directories with lower latencies. This improved method of directory delete can be implemented through a new REST API or using the ONTAP command line interface (CLI). For more information, see Delete files and directories rapidly on the cluster

Beginning with ONTAP 9.9.1, you can also use System Manager to perform a fast directory delete. For more information, see Take corrective action based on analytics.
