NDMP error messages

ONTAP 9

NetApp November 16, 2022

This PDF was generated from https://docs.netapp.com/us-en/ontap/tape-backup/network-communication-error-reference.html on November 16, 2022. Always check docs.netapp.com for the latest.

Table of Contents

NDMP error messages	S	1
Network communication	ation error	1
Message from Read	d Socket: error_string	1
Message from Write	e Dirnet: error_string	1
Read Socket receive	red EOF	1
ndmpd invalid version	on number: version_number ``	2
ndmpd session sess	sion_ID not active	2
Could not obtain vol	I ref for Volume volume_name	2
Data connection typ	pe ["NDMP4_ADDR_TCP" "NDMP4_ADDR_TCP_IPv6"] not supported for	
["IPv6" "IPv4"] contro	rol connections	3
DATA LISTEN: CAB	B data connection prepare precondition error	3
DATA CONNECT: C	CAB data connection prepare precondition error	3
Error:show failed: C	Cannot get password for user ' <username>'</username>	4

NDMP error messages

Network communication error

Message

Network communication error

Cause

Communication to a remote tape in an NDMP three-way connection has failed.

· Corrective action

Check the network connection to the remote mover.

Message from Read Socket: error_string

Message

Message from Read Socket: error string

Cause

Restore communication from the remote tape in NDMP 3-way connection has errors.

· Corrective action

Check the network connection to the remote mover.

Message from Write Dirnet: error_string

Message

Message from Write Dirnet: error string

Cause

Backup communication to a remote tape in an NDMP three-way connection has an error.

· Corrective action

Check the network connection to the remote mover.

Read Socket received EOF

Message

Read Socket received EOF

Cause

Attempt to communicate with a remote tape in an NDMP three-way connection has reached the End Of File mark. You might be attempting a three-way restore from a backup image with a larger block size.

· Corrective action

Specify the correct block size and retry the restore operation.

ndmpd invalid version number: version_number ``

Message

ndmpd invalid version number: version number

Cause

The NDMP version specified is not supported by the storage system.

Corrective action

Specify NDMP version 4.

ndmpd session session_ID not active

Message

ndmpd session session ID not active

Cause

The NDMP session might not exist.

· Corrective action

Use the ndmpd status command to view the active NDMP sessions.

Could not obtain vol ref for Volume volume_name

Message

Could not obtain vol ref for Volume vol_name

Cause

The volume reference could not be obtained because the volume might be in use by other operations.

· Corrective action

Retry the operation later.

Data connection type ["NDMP4_ADDR_TCP"|"NDMP4_ADDR_TCP_IPv6"] not supported for ["IPv6"|"IPv4"] control connections

Message

Data connection type ["NDMP4_ADDR_TCP"|"NDMP4_ADDR_TCP_IPv6"] not supported for ["IPv6"|"IPv4"] control connections

Cause

In node-scoped NDMP mode, the NDMP data connection established must be of the same network address type (IPv4 or IPv6) as the NDMP control connection.

· Corrective action

Contact your backup application vendor.

DATA LISTEN: CAB data connection prepare precondition error

Message

DATA LISTEN: CAB data connection prepare precondition error

Cause

NDMP data listen fails when the backup application has negotiated the CAB extension with the NDMP server and there is a mismatch in the specified NDMP data connection address type between the NDMP CAB DATA CONN PREPARE and the NDMP DATA LISTEN messages.

· Corrective action

Contact your backup application vendor.

DATA CONNECT: CAB data connection prepare precondition error

Message

DATA CONNECT: CAB data connection prepare precondition error

Cause

NDMP data connect fails when the backup application has negotiated the CAB extension with the NDMP server and there is a mismatch in the specified NDMP data connection address type between the NDMP CAB DATA CONN PREPARE and the NDMP DATA CONNECT messages.

Corrective action

Error:show failed: Cannot get password for user '<username>'

Message

Error: show failed: Cannot get password for user '<username>'

Cause

Incomplete user account configuration for NDMP

Corrective action

Ensure that the user account is associated with the SSH access method and the authentication method is user password.
